PROFESSIONAL SUMMARY

IT professional and Griffith University Bachelor of IT student (Data Analytics & IoT) combining 2+ years of operational systems experience across HR technology, disability services, and real estate with growing technical capability in SQL, Python, MongoDB, and R. Proven record of self-teaching enterprise systems quickly, delivering measurable outcomes in data management and process improvement, and bridging the gap between technical implementation and business need. Brings a practical, people-focused perspective to data, systems, and process work - with documented results including zero data loss across a 200-employee HRIS migration and zero non-compliance findings across a 50+ staff NDIS audit.

AREAS OF EXPERTISE

Requirements Analysis · Process Documentation · Data Validation & Migration · Business Process Improvement · Stakeholder Coordination · HRIS Systems Administration · Compliance Reporting · SQL & Python · MongoDB | R (RStudio) · Excel · SharePoint · System Analysis & Design · Agile Exposure · Technical Writing · User Training & Support · VS Code · AI prompt engineering

EXPERIENCE

Office Manager | RE/MAX Residence | Jun 2023 – Oct 2023

- Administered Vaultre CRM for 15+ users including listings, access management, troubleshooting, and automated report generation — serving as the primary system administrator for the office.
- Built Excel-based financial tracking systems for settlement costs and marketing expenditure across all property transactions, improving data visibility and reducing reconciliation time.
- Authored a 20-page process manual documenting all business workflows — created unprompted, adopted team-wide, and used as the primary onboarding reference.
- Configured computers and systems for new employees including software installation, network access, and user account management across business platforms.

Human Resources Coordinator | Genuity | Jan 2023 – Mar 2023

- Supported Employee Connect HRIS implementation across the full solution lifecycle — attending sprint planning sessions, contributing to workflow design, and validating data accuracy throughout.
- Cleansed and validated 200 employee records for HRIS migration, building Excel tracking systems confirming zero data loss throughout transition.
- Delivered WGEA statutory compliance report independently — extracting, analysing, and presenting workforce data to meet regulatory reporting requirements.
- Self-taught SharePoint administration and redesigned the HR intranet for improved usability, navigation, and functionality.
- Managed Go1 LMS user access and permissions across the organisation.

Administration Officer | Open Futures Disability Services | Jul 2022 – Dec 2022

- Prepared NDIS audit documentation for 50+ employees, achieving zero non-compliance findings through rigorous information management and process adherence.
- Built a Risk Management System in Excel from scratch including continuous improvement and risk registers — developed collaboratively with the Director.
- Identified manual process inefficiencies and implemented improvements including email automation and editable PDF systems, reducing administrative effort across the team.
- Processed invoices using Proda and Splose while maintaining accuracy across Xero reconciliation tasks.

Human Resources Administrator | Multicap | Nov 2021 – Jul 2022

- Maintained data accuracy across two concurrent enterprise HRIS platforms — TechnologyOne CI Anywhere (1,200 employees) and Aurion (500 employees) — simultaneously.
- Self-taught Aurion HRIS to full operational proficiency within one week without formal training, supporting a 500-person organisation from day one.
- Identified and resolved payroll discrepancies through systematic data analysis, documenting findings and escalating with clear supporting evidence.
- Trained two new HR team members on systems, processes, and enterprise agreement interpretation.
- Managed high-volume support inbox averaging 50+ daily enquiries, providing level 1 and 2 system support across both organisations.

PROJECTS

Business Analysis — WattWise | Griffith University | 2026

Conducted structured requirements elicitation using AI-simulated persona interviews, producing empathy maps, user personas, and functional and non-functional requirements for a 6-page web application. Coordinated delivery across a 6-person agile team using GitHub for task ownership and version control.

Business Analysis — Fluir | Griffith University | 2026 — High Distinction

Conducted market analysis using Google Trends and population data, delivered TAM/SAM/SOM analysis, built a full Business Model Canvas across 9 components, and presented a 5-minute evidence-based stakeholder pitch applying Lean Startup principles.

Big Data Analytics — MongoDB & R | 2030ICT, Griffith University | 2026 (Current)

Working with an 85,000+ record IMDb dataset using MongoDB and Mongosh — writing filter queries, comparison operators, JSON Schema validation, and update commands. Performing classification modelling in R/RStudio using tidyverse, ggplot2, and rpart including train/test splitting and confusionMatrix evaluation.

EDUCATION

Bachelor of Information Technology | Griffith University | Feb 2026 – Present

Major: Data Analytics and Internet of Things (IoT) | online

Relevant coursework: SQL, Python, Database Design, System Analysis & Design, Requirements Analysis, Big Data Analytics (MongoDB, R), Cybersecurity Fundamentals, Programming for Robotics (C++, ESP32)

Diploma of Information Technology | Griffith College | Completed Feb 2026

ADDITIONAL

Genos Emotional Intelligence Assessment — 97/99 (Top 3% globally)

Full unrestricted working rights in Australia

Available for permanent, contract, or temporary roles

Open to remote work
